Re: Genetically Engineered Foods

Dear FDA Commissioner:

I am writing to express my opposition to the FDA's proposed rule and guidance on genetically engineered foods. The agency's voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- All genetically engineered foods and food ingredients should be labeled so that I am informed and have a choice.
- A moratorium should be placed on genetically engineered foods until long-term studies show they are safe for human health and for the environment.

Sincerely,

Ann du Pont
